SQL, MongoDB

PROJECTS / OPEN-SOURCE

DOCTOR_APPOINTMENT | [LINK](#)

MongoDB, React.js, Express.js, nodejs

A Doctor Appointment Booking System using the MERN stack allows patients to book, reschedule, and cancel appointments. Doctors can manage schedules and view patient details. The system includes authentication, notifications, and role-based access, ensuring a seamless booking experience.

BOOK_STORE | [LINK](#)

MongoDB, React.js, Express.js, Nodejs

Book Store Project (MERN) where users can browse, search, and purchase books. Admin has the ability to add, update, and delete books. MongoDB is used for storing books and user data. Secure authentication is implemented using JWT for users.

This project can be used for online book selling platforms, libraries, or personal collections.

FLIGHT_BOOKING_WEBSITE | [LINK](#)

MongoDB, React.js, Express.js, Nodejs

The Flight Booking App is a web application designed to allow users to search for flights, book tickets, and manage their bookings in an intuitive and seamless manner. The project aims to streamline the flight booking process with easy navigation, secure payment options.

CERTIFICATIONS
